

Groundwater in Alberta - yesterday, today and tomorrow, the challenges and the opportunities

David McKenna, Alberta Environment

Re-establishing and sustaining a World-Class Groundwater Management System in Alberta is both the challenge and the opportunity. A review of Alberta Environment's policies and future plans.

David McKenna, BA Geog., BSc. Bio

Graduate from University of Western Ontario (BA Geog., BSc. Bio). He has spent most of his career as a fish and wildlife biologist, working for various Provincial and Federal Departments across Canada. He has also worked as a consultant and as an educator. He has had the opportunity to work throughout the Great Lakes and on all three of Canada's oceans, the Atlantic, Pacific and Arctic. He has worked for the Alberta Government since May 2000, joining Alberta Environment in December 2005. He was recently asked to lead the newly formed Groundwater Policy Branch.
